# ORDER15 MOVEMENT

---

## What is Order15?

Order15 is a non violent philosophy that recognizes the time for electoral politics in the interest of western man are over, and that the establishment of ethno-European non coercive decentralized communities are now a realistic and important necessity. A community built on trust and mutual aid rather than state regulation and fear.

---

## Beyond Mainstream Politics

The electoral political system has failed. The people don't have a voice, the "left - right" paradigm is divisive, and the government is irreversibly corrupt. Order15 directly responds to this flawed political climate and transcends the "left - right" political paradigm altogether. Rather than wait for the state to change things, Order15 seeks to actively create the world in which we want to live.

---

## **Small is better**

Order15 does not attempt to impose a world view or way of living. In contrast to nation states which attempt to centrally govern huge expanses of territory. Order15 “at this time” supports decentralized federations of small ethno-European autonomous, local communities, centered around farming and semi self-sufficiency.

---

## **The nation is the people NOT the state**

The “nation” to Order15 no longer refers to a government, state, or arbitrary boards. Rather nation is simply an ethno-European community or group of people working together for the common lifestyles and goals that best serve their needs and that of their ethnic group. Ethno-European nations can also be created based on infinite factors, including loyalty, religion, language, subculture, ideology, even occupation. Anything “healthy” and in keeping with Order15 ideology that unifies should be considered as the basis for nationhood.

---

## **Why and what for**

Order15 is an international Nationalist organization dealing with 5 key areas: Order, Re-education, Divinity, Esthetics, Resettlement.

The intent of Order15 is a spiritual one, to look inward rather than being focused on combating the forces that are waging our destruction. In order to improve ourselves to grow, nurture, learn, and advance as European people, we must rediscover and reconnect with those things that made us great in the first place.
